

The Low Power Programmable Leader

First Quarter, 2020

Safe Harbor

This presentation contains forward-looking statements that involve estimates, assumptions, risks and uncertainties, including statements relating to our expectations about our systems solutions' offerings under the heading "Future," and the statements under the heading "Q120 Business Outlook."

Factors that may cause actual results to differ materially from the forward-looking statements in this presentation include those risks more fully described in Lattice's filings with the SEC including its annual report on Form 10-K for the fiscal year ended December 29, 2018 and quarterly filings.

You should not unduly rely on forward-looking statements because actual results could differ materially from those expressed in any forward-looking statements. In addition, any forward-looking statement applies only as of the date on which it is made. The Company does not intend to update or revise any forward-looking statements, whether as a result of events or circumstances after the date hereof or to reflect the occurrence of unanticipated events.

The background is a dark blue, abstract digital landscape. It features a grid of small, glowing blue cubes or pixels. Overlaid on this grid are several bright red laser lines that crisscross the frame. There are also some out-of-focus blue and yellow light spots, giving it a sense of depth and high-tech environment.

of Use

Lattice Product Portfolio

BROAD FAMILY OF LOW POWER FGAs

GENERAL PURPOSE

Addresses a broad range of applications across multiple markets

- Up to 150K LUTs in 10x10 mm csfBGA
- Highest density & lowest power SERDES in smallest package

FPGA FAMILIES TAILORED FOR SPECIFIC NEEDS

VIDEO CONNECTIVITY

Optimized for high speed video and sensor applications

- First FPGA with hardened MIPI D-PHY
- Highest performance at lowest power

ULTRA LOW POWER

World's lowest power FGAs; Optimized for small form factor

- Sleep current as low as 25uA
- World's most popular ultra-low power FPGA

CONTROL & SECURITY

Optimized for platform management & security applications

- 50% market share
- Highest I/O density

AVAILABLE NOW

LATTICE NEXUS

Next Generation FD-SOI FPGA Platform

- Low power leadership
- Edge computing ready
- Robust and reliable
- Smallest form factor
- Faster innovation cadence

Lattice Nexus is Changing the FPGA Landscape
