

Lattice to Host Live Webinar ‘End-to-End Supply Chain Protection With Dynamic Trust’

September 10, 2020

Free Webinar Will Highlight Advantages of Securing Hardware with Lattice Sentry Solutions Stack and Lattice SupplyGuard Service

HILLSBORO, Ore.--(BUSINESS WIRE)--Sep. 10, 2020-- [Lattice Semiconductor Corporation](#) (NASDAQ: LSCC), the low power programmable leader, will host a free live webinar highlighting the new Lattice Sentry™ solutions stack and the Lattice SupplyGuard™ supply chain protection service titled “End-to-end Supply Chain Protection with Dynamic Trust” on Tuesday, September 22nd, 2020 in North America and on Monday, September 28th, 2020 in Europe. The same webinar will be presented in Mandarin on Thursday, September 24th, 2020 in Asia.

Topic: End-to-end Supply Chain Protection with Dynamic Trust

When: Tuesday, September 22nd, 2020 at 11:00 AM PDT (North America)

Thursday, September 24th, 2020 at 2:00 PM CST (Asia)

Monday, September 28th, 2020 at 4:00 PM CET (Europe)

Securing product designs against firmware-based attacks is a serious concern among OEMs as firmware attacks grow and pose serious security concerns across markets. To protect system firmware, security solutions need “dynamic trust”: resiliency against firmware attacks based on a parallel, real-time, reactive solution that offers comprehensive firmware protection throughout a system’s lifecycle, beginning with the time components spend moving through the supply chain, from initial product assembly, end-product shipping, integration, and the product’s entire operational lifetime. This webinar will explore how developers can secure the supply chain with “dynamic trust” by using the Lattice Sentry solutions stack and the SupplyGuard supply chain protection service and add NIST SP-800-193-compliant, nanosecond reactive, next-generation firmware security to their communications, datacenter, industrial, automotive, aerospace, and client computing systems.

About Lattice Semiconductor

Lattice Semiconductor (NASDAQ: LSCC) is the low power programmable leader. We solve customer problems across the network, from the Edge to the Cloud, in the growing communications, computing, industrial, automotive, and consumer markets. Our technology, long-standing relationships, and commitment to world-class support lets our customers quickly and easily unleash their innovation to create a smart, secure and connected world.
